ABSTRACT

The major features of the Child Support Enforcement program as prescribed by Federal statute and regulation are outlined. Also described are significant accomplishments and problems encountered in the administration of the program, in the development of policy, in the provision of technical assistance to the States, and in the provision of direct service through the Federal Parent Locator Service (PLA). The research undertaken and the services rendered by organizations outside of the government are also. described. The research projects discussed are: (1) Comparative Study of Procedures and Systems to Establish Paternity; (2) Using Blood Tests to Establish Paternity; (3) Development of an Operational Handbook and Procedures for Establishment of Paternity; (4) IV-D Technology Transfer Model; and (5) Guide for Determining Child Support Payments from an Absent Parent. There is a chapter devoted to state IV-D programs and it includes a statistical and program characteristics profile for each state as of September 30,1976. Information, 'in tabular form, concerning the impact of the Child Support Enforcement program is also provided. (Author/AM)

Documents acquired by ERIC include many informal unpublished

materials not available from other sources. ERIC makes every effort

to obtain the best copy available. Nevertheless! items of marginal * reproducibility are often encountered and this affects the quality

of the microfiche and hardcopy reproductions ERIC makes available

^{*} via the ERIC Document Reproduction Service (EDRS) . EDRS is not

responsible for the quality of the original document. Reproductions

supplied by EDRS are the best that can be made from the original.

INTRODUCTION

This is a special supplemental report to the Congress on the Child Support Enforcement program required by Section 452(a)(10) of the Social Security Act as amended by Public Law 95-30.

The first annual report covered the period January 4, 1975 - June 30, 1976 insofar as data were available. The report here submitted updates data contained in the earlier report and carries it through the transition quarter which ended September 30, 1976. Significant program accomplishments and problems encountered during the transition quarter are also discussed.

ABBREVIATIONS-

Act - Social Security Act

AFDC - Aid to Families with Dependent Children

Department - Department of Health, Education, and Welfare

FFP - Federal Financial Participation

IV-D - Title IV-D of the Social Security Act

IV-D Agency - State agency administering the IV-D Child Support Enforcement program

IV-D Program - The Child Support Enforcement program under title IV-D

MEW - Department of Health, Education, and Welfare

OCSE - Office of Child Support Enforcement, HEW

PLS - Federal Parent Locator Service

Regional Office - Regional Office of OCSE

RFP - Request for Proposal

SSA - Social Security Administration, HEW

SSN - Social Security Number

SRS - Social and Rehabilitation Service, HEW

State - The 50 States, District of Columbia, Guam, Puerto Rico and the Virgin Islands

· URESA - Uniform Reciprocal Enforcement of Support Act

Chapter I
Summary of the Program

The provisions of the Child Support Enforcement program are contained in P.L. 93-647, P.L. 94-88, and 45 CFR Part 300. This chapter outlines the major features of the program as preseribed by statute and regulation.

State and local requirements

Each applicant for, or recipient of, Aid to Families with Dependent Children (AFDC) is required, as a condition of eligibility for AFDC, to make an assignment of support rights to the State. Although this is actually a requirement of title IV-A of the Act, it is the cornerstone of the IV-D program. In the absence of an assignment, a child support case is outside of the IV-D program and is not eligible for Federal financial participation under IV-D.

Each applicant for, or recipient of, AFDC is also required, as a condition of eligibility for AFDC, to cooperate with the State if necessary in establishing paternity and securing support. As part of P.L. 94-88, Congress provided an exception to cooperation in those cases in which it would not be in the best interests of the child to cooperate. These are also requirements under Title IV-A of the Act, and are therefore administered by the State IV-A agency.

Each State is required to establish or designate a single and separate organizational unit to administer the IV-D program within the State. This unit is referred to as the IV-D agency. The IV-D agency may be established as a new State agency or may be located within an existing department such as the State welfare agency.

The IV-D agency is responsible for establishing paternity and securing support on behalf of AFDC children for whom there is an assignment of support rights in effect. This function may be performed directly by the IV-D agency or may be accomplished through cooperative agreements with law enforcement officials such as district attorneys, friends of the court, and attorneys general.

Child support payments made on behalf of AFDC children must be paid to the State for distribution rather than directly to the family. States no longer have the option of allowing payments directly to the family as an offset against the assistance grant as they had under the repealed child support provisions under title IV-A. If the child support collection is insufficient to make the family ineligible for public assistance, the family receives its full welfare grant and the child support is distributed as required by section 457 of the Act.

Under section 457, the child support collection is used primarily to reimburse assistance payments that have been made to the family. Until September 30, 1976, 40 percent of the first \$50 of the monthly support collection (or in other words, a maximum of \$20) was paid to the family in addition to the assistance grant and was disregarded for purposes of AFDC: The balance of the collection was used (with minor exceptions) to reimburse the State and Federal governments to the extent of their participation in the financing of current and past assistance payments to the family. If there were no unreimbursed assistance payments, the amount collected was paid to the family.

The IV-D agency is required to establish a parent locator service for the purpose of locating absent parents. The parent locator service must utilize appropriate sources of information at the State and local level, and must also utilize the Federal Parent Locator Service.

Each State must cooperate with other States in order to locate absent parents, establish paternity, and secure support. The primary interstate child support enforcement mechanism is the Uniform Reciprocal Enforcement of Support Act (URESA) which establishes procedures in each State for initiating or responding to interstate support actions.

Finally, each State is required to make its child support services available to individuals who are not recipients of AFDC if such individuals apply for child support services. The State may elect to charge an application fee, and may also elect to recover costs that are in excess of the application fee from the amount of child support that is collected. The application fee may either be a flat fee not exceeding \$20, or a sliding fee based on the applicant's income.

Federal requirements

Although the primary responsibility for locating absent parents, establishing paternity, and securing support rests with the States utilizing State laws and procedures, the IV-D program substantially increases the Federal role in child support enforcement.

The Department is required to establish a separate organizational unit, the head of which must report directly to the Secretary of HEW. The Office of Child Support Enforcement (OCSE) is the separate organizational unit required by the Act.

OCSE is required to review and approve State IV-D plans, establish standards for effective State child support programs, and establish minimum organizational and staffing requirements for IV-D agencies. OCSE is also required to provide technical assistance to States, assist them with reporting procedures, and maintain records of program operations and child support expenditures and collections.

A unique requirement imposed upon the Federal government relates to using the United States district courts for enforcement of child support orders in interstate cases. If another State fails to undertake to enforce a child support order on behalf of the requesting State within a reasonable time, the requesting State may ask OCSE to certify the case for use of the Federal courts. If the application meets certain procedural requirements and it is determined that use of the Federal courts is the only reasonable method of enforcing the order, the case would be certified and the United States district court would have jurisdiction to hear the case.

Another Federal requirement involves the use of the Internal Revenue Service in collecting delinquent child support. This provision is available only for AFDC cases in which there is a court order for child support which is delinquent. The State must have attempted to collect the amount utilizing its own remedies. If the State is unsuccessful, it may apply to DCSE for a certification of the delinquent amount to the Internal Revenue Service for collection pursuant to section 6305 of the Internal Revenue Code of 1954.

The Federal Parent Locator Service (PLS) is a major requirement imposed on OCSE and is its most direct involvement in the child support process. A description of the PLS was contained in the First Annual Report.

A final requirement is that OCSE evaluate the implementation of State child support programs and conduct an annual audit of each State to determine if it has an effective program that meets the requirements of the law.

Financial provisions

Section 455 of the Act provides for 75 percent Federal financial participation in the administrative costs incurred by the State pursuant to an approved IV-D plan. This includes costs incurred by law enforcement officials pursuant to cooperative agreements with the IV-D agency. The rate of Federal reimbursement has increased substantially as compared to the 50 percent reimbursement available under the repealed child support provisions of title IV-A.

Section 455 includes 75 percent reimbursement for costs incurred with respect to cases which do not involve AFDC recipients. However, reimbursement for these non-AFDC cases is due to expire on June 30, 1977. Unless the statute is amended, the only cost with respect to non-AFDC cases that will be eligible for Federal financial participation after that date will be cost of parent locator services.

A unique financial provision of title IV-D is contained in section 458 of the Act. Political subdivisions that enforce and collect child support on behalf of the State receive an incentive payment in cases involving an AFDC recipient. The provision also applies to States that enforce and collect child support on behalf of other States. The incentive payment rate depends on when the child support collection is made. For the first 12 months of collections in a particular case, the incentive is 25 percent of the amount of the collection that is used to reimburse assistance payments. After 12 months of collections in a particular case, the incentive drops to 10 percent of the amount of the collection that is used to reimburse assistance payments. This payment represents a true incentive to the jurisdiction receiving it since it is financed entirely from the amount of the child support collection that would otherwise be reimbursed to the Federal government.

The final financial provision of IV-D is a financial penalty. If a State is found by the annual audit to have a child support program which is not effective and does not meet the requirements of title IV-D, the State's IV-A reimbursement will be reduced by 5 percent.

Garnishment

Section 459 of the Act provides consent of the United States to the garnishment of Federal employees' wages or retirement benefits for the purpose of enforcing child support or alimony obligations. The provision does not establish new Federal procedures for securing garnishment; it merely waives the sovereign immunity of the United States. State statutes and procedures for obtaining a writ or order of garnishment and securing service of process on the employer must be followed.

A lack of uniformity among Federal agencies in processing garmishment orders and handling service of process has arisen because the statute does not assign responsibility for issuing implementing regulations. The President therefore directed the Civil Service Commission, in consultation with the Department of Justice; to prepare regulations to establish uniformity in garnishment procedures among the agencies of the Executive Branch.

Chapter II
Program Accomplishments

This Chapter describes significant accomplishments and problems encountered in the administration of the program, in the development of policy, in the provision of technical assistance to the States, and in the provision of direct service through the PLS:

Administration

The 170 positions authorized for the Child Support Enforcement program have been allocated as follows:

_	OCSE Central Office	_ \$. 63
•	OCSE Regional Offices -		- 70 .
•	SRS Central Offite for certain	•	~
	support functions -		15
•	SRS Regional Offices for financial management support -	,	10
	Office of the General Counsel (2 Central; 10 Regional Offices	, -	,
	for legal support) -	4-4	12

As of September 30, 1976, a total of 23 positions in Central Office had been filled; a total of 39 in the Regional Offices (Exhibit A). Table 1 shows the estimated cost, by category, for OCSE Central Office staff since February 12, 1976, when separate accounting began. Table 2 gives this information for Regional Office staff.

OCSE is responsible for all program and policy aspects of IV-D. In order to carry out this mission, OCSE has been organized into three divisions (Policy and Planning, Parent Locator Service, and Administrative), and ten regional offices. The primary function of the Policy and Planning Division is to provide policy development and interpretation, assist States in improved IV-D management practices, and provide a planning capability for OCSE. The primary function of the Parent Locator Service Division is to operate the PLS and to coordinate and enhance State IV-D systems activities. The Administrative Division is responsible for providing administrative services such as personnel liaison and for developing and coordinating the annual audit function. A more complete description of OGSE, by branch, is contained in Exhibit B on the following pages.

SUMMARY OF FUNCTIONS BY ORGANIZATION

PARENT LOCATOR SERVICE DIVISION

Systems Operations Branch

- Develop, operate, and maintain the garent Locator Service
- --Specify manner and form for requesting information from PLS (hardcopy, punched cards, magnetic tape, and terminal-to-terminal)
- -≃Besign automated systems to support PLS
- --Establish and maintain communication network between States and PLS, and between PLS and other Federal agencies.
- -- Perform data conversion for input to PLS and output to States
- -- Technical assistance to States on use of PLS
- --Maintain billing records on non-welfare cases
- -- Assist in development of program policy and regulations relevant to PLS
- -- Answer telephone inquiries from public
- *-Maintain statistics on use of PLS

State Coordination Branch

- --Evaluate State applications for Federal financial participation for purchase or design of IV-D information systems
- -- Evaluate State PLS meeds and plan improvements of State systems
- Develop and encourage use of model systems
- T-- Provide technical assestance to States on IV-D systems

POLICY AND PLANNING DIVISION'

Policy Branch

- --Develop and coordinate all regulations implementing title IV-D and related legislation
- --Develop standards for effective State programs
- --Develop minimum State organizational and staffing requirements
- -- Develop and maintain procedures for Internal Revenue Service collections
- --Develop and maintain procedures for enforcement by Federal courts
- --Provide policy interpretation to Regional Offices
- --Develop and coordinate training for Federal and State personnel
- --Provide technical assistance to Regions, and occasionally to States on all aspects of program except PLS and systems
- --Review and develop proposed legislation
- --Develop procedures for State plan review and approval by Regional Offices
- --Review Regional Office recommendations of State plan disapproval
- --Evaluate effectiveness of State programs
- --Monitor and coordinate activities of Regional Offices
- --Provide in-house legal capability and liaison with Office of General Counsel
- -- Coordinate preparation of annual report to Congress

Planning and Evaluation Branch

- --Develop OCSE long and short-range plans and objectives
- --Develop the annual OPS plan and track milestones
- --Design statistical reporting requirements and methods for obtaining data
- --Conduct statistical research studies and analysis, trend and cost projecting and reporting
- --Recommend program and legislative changes based on research and analysis
- -- Develop research and demonstration projects
- *-Provide liaison to SRS Office of Planning, Research, and Evaluation
- --Participate in development of annual audit plan
- -- Evaluate deployment of resources for achievement of objectives and operational goals
- --Develop program budget .

ADMINISTRATIVE DIVISION

Office of Division Director

(Budget officer and assistant)

- -- Prepare salaries and expenses budget
- --Coordinate all OCSE budget matters
- --Coordinate financial reporting requirements with appropriate SRS offices
- --Prepare background and justification material for OMB and Congressional hearings
- --Control annual and quarterly obligations and expenditures
- --Issue, review, and control travel authorizations
- --Review and control travel vouchers

Audit Support Branch

- --Develop standards and requirements for annual audits
- -- Coordinate Regional Office activities related to annual audit
- --Provide interpretations to Regions and States concerning audit procedures and standards
- --Review penalty recommendations made by Regional Offices and recommend approval or non-approval to Director
- -- Review audit reports from GAO and HEW Audit Agency

Administrative Support Branch

- --Personnel management (staff planning, position descriptions, recruitment, performance evaluations)
- --Labor-management relations
- --Liation with SRS Division of Personnel
- --Control manpower authorizations
- --Space management
- --Procurement of property and supplies
- -- Maintain property records

--Liaison with SRS Division of General Services

--State plan control and filing
--Control all incoming correspondence such as Regional and
Congressional inquiries
--Coordinate preparation of issuances within OCSE
--Edit proposed issuances and regulations for formal requirements

(e.g., Federal Register requirements)

Policy

On July 9, 1976, a Notice of Intent to Propose Audit and Penalty Regulations.was published in the Federal Register. These regulations are necessary to provide a regulatory basis for carrying out provisions in Sections 452(a)(4) and 403(h) of the Act relating to the requirements for an annual audit of each State's program and a possible penalty of five percent of a State's title IV-A reimbursement. _On August 13, OCSE made available for comment a draft of a Notice of Proposed Rulemaking. The term "effective program" was defined therein as a program that meets the various requirements of the State plan. This definition constitutes the minimum standards necessary to fulfill the statutory mandate to carry out the audit and penalty provision. It is a recognition of the fact that the States have had a relatively short time in which to implement a complicated new program. To impose stringent audit regulations early in the program could result in penalties in many States, particularly those that had no child support enforcement activities prior to the enactment of title IV-D. intention was to impose more stringent standards as the program progresses. Final Regulations were scheduled for publication in December 1976, with the first audit to cover the period January 1, 1977 through September 30,.1977.

Section 208 of P.L. 94-88, approved August 9, 1975, amended the eligibility requirement that applicants for, and recipients of, AFDC cooperate with the State in establishing paternity and securing support for their children (Section 402(a)(26) of the Act) by providing that cooperation could be excused when the State determined that the caretaker has "good cause" for not cooperating. The amendment requires the Secretary to adopt standards to be used by the States in making the good cause determination. These standards are to take into consideration the best interests of the child.

On August 13, 1976, the Department published a Notice of Proposed Rulemaking in the Federal Register to implement the good cause amendment. The proposed regulation attempted to accomplish two goals which are difficult to achieve simultaneously: protect children and their custodial parents or caretaker relatives from being harmed by the child support enforcement process; and maintain the integrity of the Child Support Enforcement program. The proposal generated much controversy. Of the 1,700 comments received, many indicated that the Department was creating a loop-hole in the child support enforcement process, while others felt that the proposal did not go far enough to protect the child and caretaker from possible adverse consequences of enforcing support.

Technical Assistance to the States

The following Action Transmittals were sent to State IV-D Agencies and other interested individuals during the transition quarter:

<u>Title</u>	<u>I</u>	ssuance No. Date/Type		
First Annual Report to Congress on the Child Support Enforcement Program		CSE-AT-76-10 /1/76		
Title IV-D, Social Security Act: Audit and Penalty Requirements in the Child Support Enforcement- Program		CSĘ-AT-76-11 /9/77	· .	
Proposed Instructions for Allocation of Incentive Payments Among Jurisdictions Pursuant to Section 458(b) of the Act		CSE-AT-76-12 /22/76	,	
Good Cause for Refusing to Cooperate in Child Support Enforcement Program (Proposed Rulemaking)		CSE-AT-76-13 /16/76		
Eligibility Determination in Cases of Continued Absence: Agency Responsibility and Federal Matching Rate	9,	CSE-AT-76-14 /13/76 SRS-AT-76-145	(APA))	•

Review guides for collections and program operations were developed and tested. The Collections Review provides an assessment of State and local performance in meeting the requirements to account for, distribute and report collections. The Program Review is a planned, organized analysis and evaluation of State Child Support Enforcement activities.

Two contracts were funded from salary and expense (S&E) funds, one for developing a model State IV-D administrative and reporting system; and the other for improving the States' Federal financial reporting. The model State IV-D system is to be used by OCSE to

assist the States in preventing or alleviating problems of accuracy and accountability in regard to collections and expenditures. The model will also serve as a guide to States in establishing or modifying organization, staffing patterns, and management control.

A training manual of financial reporting requirements will be developed under the second contract. Training sessions for State personnel on the use of the manual will follow. After participation in these training sessions, State personnel should be able to conduct their own future training sessions. The contract was necessitated by the difficulty experienced by many States in meeting reporting requirements and maintaining compatibility between actual expenditures and collections reported versus projected estimates for expenditures and collections.

The most significant problem experienced has been the lack of sufficient staff. The existing staff has concentrated primarily on the program review and monitoring function. Due to hiring constraints, the identification and development of successful State program practices for possible transfer to other States and the development of procedural guidelines for State use have not been fully accomplished. With full staffing, it will be possible to carry out responsibilities for providing technical assistance to the States in a manner contemplated by the program legislation.

Parent Locator Services

Reviews of State and county requests for Federal financial participation (FFP) for development and operation of child support enforcement information systems have been conducted. These reviews addressed States' planning documents for systems activities, requests for proposals (RFP) for soliciting contractor support, and contracts between State IV-D agencies and contractors. Detailed comments, including required changes, were written up and provided to each State.

Systems have been reviewed for technical sufficiency as well as for compliance with Federal regulations. Reports depicting shortcomings, where applicable, were prepared and forwarded to the States for corrective action. Several systems were upgraded to reflect proposed Federal changes.

Increased nationwide accessibility to the Federal PLS computer system has been achieved by expansion of the teleprocessing communications network. During the transition quarter, responses were made to 25,000 requests for address information and addresses returned on approximately 70 percent of these requests. Following a ruling by the Department to release social security numbers (SSN) to the Federal PLS, the

méchanism and procedures to search for the SSNs and provide the numbers to States to aid in locating absent parents were implemented. Potential sources of address information were identified and formal negotiations initiated with the Veterans Administration and the National Personnel Records Center for such information.

Car.

Chapter III

Research Projects and Other Outside Services

In order to expand efforts beyond existing staff resources, OCSE has used funds available under Section 1110 of the Social Security Act for research contracts and grants. Funds from the salary and expense (S&E) budget have also been used to contract for the performance of certain needed services. This chapter describes research undertaken and services rendered by organizations outside of the government and discusses findings and results where appropriate.

The research projects discussed are: (1) Comparative Study of Procedures and Systems to Establish Paternity; (2) Using Blood Tests to Establish Paternity; (3) Development of an Operational Handbook and Procedures for Establishment of Paternity; (4) IV-D Technology Transfer Model; and (5) Guide for Determining Child Support Payments from an Absent Parent.

Comparative Study of Procedures and Systems to Establish Paternity

The grantee for this project, which was completed on July 31, 1976, was the Center for Health Services Research, University of Southern California. Major findings were:

- (1) Paternity determination systems throughout the United States vary tremendously in terms of techniques employed and overall system orientation and operation.
- (2) Inclusion of the proper mix of procedures is essential to a successful paternity operation. This mix includes: use of highly trained, completion-oriented personnel to conduct the initial interview and to process the case rapidly; emphasis on field investigation and use of Federal and State locator services; see of blood testing, and particularly extended factor blood testing; utilization, where permissible, of procedures for default judgements and confession of judgements.
- (3) Blood testing for exclusion, inclusion, and probability of paternity determination systems.

Using Blood Tests to Establish Paternity

The grantee for this project, which was completed on August 31, 1976, was the Center for Policy Research, New York City. Major findings and recommendations are:

- (1) State laws should be changed so to allow the introduction of blood test evidence by deposition rather than by expert testimony only, so as to conserve the time of blood testing technicians.
- (2) State laws should be changed so as to admit blood test evidence for establising the probability of paternity as well as non-paternity.
- (3) States are urged to adopt a standard for paternity testing based on the recommendations of the American Medical Association/American Bar Association standard which recognizes that the entire set of tests is not mandatory in all medico-legal problems of disputed parentage.
- (4) The number of laboratories that can meet this standard today, plus those that could upgrade their capability to meet this standard, is more than adequate both in terms of capacity and geographic location to satisfy the needs of Title IV-D paternity testing.

<u>Development of an Operational Handbook and Procedures for Establishment of Paternity</u>

This one-year project, funded in FY 1976, utilizes and builds upon findings of the two research projects discussed above. The grantee is the Center for Health Services Research, University of Southern California. A consultant is the former project director for the study, "Using Blood Tests to Establish Paternity". The end product is a handbook, applicable to all jurisdictions, that will describe techniques for establishing paternity and will include legal and medical forms to be used during the determination process. The handbook will consist of an organized guide to the various steps to be followed during the allegation, location of putative father, confrontation, verification, and adjudication periods of the paternity determination process. The handbook will also describe procedures for admission of blood test results, including evidentiary requirements.

A pilot test of the handbook will be conducted in a large, medium, and small sized jurisdiction. A final report supplementing information contained in the handbook will be prepared to include pilot test results and appropriate recommendations for improvement in paternity establishment processes.

IV-D Technology Transfer Model-

This project, funded during the transition quarter, is scheduled for completion on May 31, 1977. The grantee is the National Reciprocal and Family-Support Enforcement Association, Which enlisted the National Training and Development Service as a consultant. objective is the development of new methods and procedures to assist States to improve their performance in child support enforcement by adopting more efficient administrative organizations and procedures. Representatives of several States showing above-average performance are to visit ten States desiring such ... assistance for the purpose of review and observation prior to the preparation of specific recommendations to the target States. Each of the target States will receive a written report containing recommendations in such areas as: (1) financial support system; ·(2) organization of the IV-D program; (3) legal basis of the IV-D program; (4) Statewide organization; (5) personnel system; and (6) staffing patterns and training.

Guide for Determining Child Support Payments from an Absent Parent

The grantee for this project, which was funded during the transition quarter, is the Community Council of Greater New York. The project is scheduled for completion on April 30, 1977. The Guide, designed as a concise manual of procedures for determining child support payments, will identify, analyze, and offer options in regard to issues associated with such determinations. Using family budget standard data from the U. S. Bureau of Labor Statistics and concepts developed by the Budget Standard Service of the grantee, guidelines for measuring living costs will be described. Areas to be covered include: priority of support obligations; definitions of income; definitions of resources; delinquent payments and arrearages; payment schedules; and special needs. Model computation forms and instructions will be appended.

Contracts awarded from S&E funds are: (1) Technical Assistance in Child Support Enforcement (discussed below); (2) Training Manual for OCSE Staff (discussed below); (3) Training Manual and Training Sessions on OCSE Federal Financing Reporting Requirements for State Personnel (discussed in Chapter II, pp. 18-19); and (4) Development of State IV-D Model Administrative and Reporting System for IV-D Collections and Expenditures (discussed in Chapter II, pp. 18-19).

Technical Assistance in Child Support Enforcement

This contract with the National District Attorney's Association (NDAA), first funded in fiscal year 1975, was extended for one year beginning

August 31, 1976. The major goal is to inform prosecutors and similar legal staff in State and local agencies of the requirements of Title IV-D as well as the most effective and efficient means of organizing and conducting child support enforcement programs. NDAA provides consultant services to jurisdictions requiring special help with organizing and operating IV-D programs. Experts in specific areas of child support enforcement make site visits to various county offices nationwide while technical assistance teams analyze specific problems and recommend procedures that have proved successful elsewhere and would be appropriate to local circumstances. Through its clearinghouse, reference service, and "hot line", NDAA provides guidance to prosecutors and child support enforcement personnel in such areas as: parent location, paternity procedures, URESA cases, garnishment actions, administrative data processing and reporting procedures, and IRS collections.

Training Manual for OCSE Staff

This contract with Planning and Human Systems, Inc., was negotiated through the Small Business Administration with a beginning date of September 27, 1976. The work is scheduled for completion on March 28, 1977. The contractor is to develop the materials needed to provide an adequate orientation into the operational functions and work processes of OCSE and to organize them into a manual that can be used by central and regional office staff for initial training and for continuing on-the-job reference.

. Chapter IV Summary of State IV-D Programs

This chapter contains a report on the status of State IV-D plans and a statistical and program characteristics profile for each State as of September 30, 1976.

Approval of State IV-D Plans

The IV-D plans of 49 States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands have been approved and are now in operation. The State of Missouri has not yet submitted a IV-D plan for approval.

Missouri requested and received a waiver, under Section 201 of P.L. 94-88, excusing compliance with Sections 402(a)(26) and 402(a)(27) of the Act. The waiter, which extended through June 30, 1976, was granted on the basis that Missouri lacked enabling legislation. During the period covered by the waiver, legislation was introduced but not passed by the Missouri Legislature. Consequently, the State has been unable to develop an approvable title IV-D plan. On July 1, 1976, the Secretary officially notified the State of non-compliance. The Department has taken appropriate steps to initiate a proceeding under Section 404 of the Act to determine whether Missouri's title IV-A plan is out of conformity for failure to implement Sections 402 (a)(26) and 402(a)(27) of the Act.

Statistical and Brogram Characteristics Profiles

The statistical profile was obtained from data submitted in financial reports 0%-41.3a/4a, 0A-41.6, 0A 41.17, in statistical reports OCSE 3.1 and OCSE 3.2, and from Regional Office staff. The variation in data shown in these profiles reflects a lack of consistency in reporting by the States. Information included in the program characteristics profile was obtained from State plan materials, program reviews, and Regional Office staff.

. Certain items in the statistical profiles require explanation:

AFDC and Non-AFDC Caseloads -- Regardless of the number of collections made during a quarter for a particular case, that case is counted only once. These values include only cases for which at least one collection was made.

Interstate cases -- A reporting State counts a case that was pursued at the request of another State as an interstate case.

Full-time equivalent staff -- Unless indicated otherwise, this total includes all those employed by the State and local agencies and under cooperative and purchased service agreements.

FY 1976 Totals -- Because no statistical reports for the first quarter of FY 1976 were requested, and because some States supplied more complète information on the yearly statistical report than on the reports for the individual quarters, the FY 1976 totals for some items in certain profiles do not equal the sums of the quarters presented. Because of rounding, the sum of the quarters in certain other items will not add exactly to the annual total.

Program Characteristics Profile

- Level of program administration:
 Local
- Application fee and recovery of costs in non-AFDC cases: No application fee; cost recovered from collections.
- Means of establishing support obligation: .
 Court order
- Enforcement procedures:
 Contempt proceedings; garnishment; attachment;
 criminal proceedings; Federal Courts and
 IRS
- Collections after AFDC family becomes ineligible:
- Unit receiving child support payment from absent parent: State IV-D
- Unit in which accounting system is located: State Bureau of Financial Management

State Financial and Program Data

Information concerning the impact of the Child Support Enforcement program may be obtained from data included in the tables on pages 137-153. These data were obtained from OCSE Forms OA-41.3a/4a, OA-41.16 and OA-41.17, which were submitted by State agencies.

As indicated in the tables, during FY.1976, the States reported collections of over \$217 million on behalf of families receiving AFDC. The total amount collected, including an estimate of unreported collections and payments made directly to AFDC families, is, about \$327 million. Financial benefits from the direct payments were realized in the reduction of assistance payments to the recipient families.

During the transition quarter, States collected and reported over \$84 million, while, in addition, an estimated \$10.7 million were paid directly to AFDC families.

Child support collections made on behalf of AFDC recipients increased steadily from quarter to quarter throughout FY 1976 and the transition quarter. Total administrative expenditures, which include the costs of IV-D staff, cooperative agreements and purchased services, also increased during the same period but at a rate slower than that of collections. These expenditures also include administrative costs associated with child support enforcement services provided to families not receiving AFDC. During FY 1976, States estimated collections on behalf of families who were not receiving public assistance to be about \$324 million. A total of about \$87 million were estimated as collections for non-AFDC families during the transition quarter.

Based upon total reported collections and expenditures during FY 1976, States collected an average of \$1.52 for AFDC families for each dollar spent nationwide. An average of \$1.76 was collected for each dollar spent during the transition quarter. These values include expenditures for non-AFDC cases, but do not include collections for such cases.

The amount of money remaining with State and local governments as their share of AFDC collections plus the amount received by State and local governments as incentive payments exceeded the State share of expenditures in each quarter of FY 1976 and the transition quarter. This excess, which increased in each successive quarter, resulted in a net savings at the State level of about \$79 million in FY 1976 and nearly \$39 million in the transition quarter.

The Department has not yet published the final standards for use by the States in determining whether an applicant or recipient has good cause for refusing to cooperate. Therefore, data concerning the number of cases in which the caretaker refused to cooperate and the basis for such refusal has not been collected. The final good cause regulations, when published, will require the States to, maintain records of actions taken pursuant to the good cause exception and will make possible accurate reporting in the future.

The abbreviation "NA" in the following tables indicates "Not Available".

FY'1976 Totals -- Because no statistical reports for the first quarter of FY 1976 were requested, and because some States supplied more complete information on the yearly statistical report than on the reports for the individual quarters, the FY 1976 totals, in some tables, do not equal the sum of the quarters presented. Because of rounding, the sum of the quarters in certain other tables will not add exactly to the annual total.

^{*} Actual figures
+ For Oregon, second number is not direct payment, but was also not reported as collections.
This amount was retained and used to offset claims for FFP. All numbers care estimates.

The following table presents estimates of actual non-AFDC collections. These estimates were submitted by State agencies in response to a special request from the Office of Child Support Enforcement.
